

# Bally Escapes helps us plan for brighter days ahead

Newly updated releases are streamlined, multifunctional travel essentials

Bally's Passe Partout sneakers feature a super-lightweight construction and an energy-boosting Vibram® sole

Bally knows we are all dreaming of the day we can travel again, and so has released a portfolio of updated lightweight multifunctional travel essentials.

These streamlined styles are engineered with water-resistant finishing and collapsible construction for technical adaptability.

New releases include a classic, multi-use backpack with a removable top compartment which can be worn across the body, and carry-on styles defined by sleek finishes, precision organization and subtle brand details.

Small accessories include the Fast Track, which is a mini bag worn as a belt bag or cross-body, meant for holding passports, cards and other travel documents for quick access.

The Bally Escapes jacket is made with technical nylon, and features its own pocket for foldaway ease.

The Passe Partout sneakers, "molded to the natural contours of your foot," have a super-lightweight construction and an energy-boosting Vibram® sole, famous in long-distance running and hiking.
