

Travel Blue introduces ergonomic massage neck pillow

Travel Blue's new Massage Neck Pillow combines an ergonomic shape with a three-speed massage unit

Travel accessories supplier Travel Blue Group is exhibiting its next generation of travel pillows at the TFWA World Exhibition (Stand number: Red Village L14).

Following the success of the Tranquillity Pillow, Travel Blue is introducing the Massage Neck Pillow, based on the popular ergonomic shape of the Tranquillity Pillow, plus a three-speed massage unit.

The new pillow has high-density memory foam that softens in reaction to body heat, allowing the contours of the pillow to mould to the neck and shoulders and giving a feeling of restfulness.

Travel Blue's Jonathan Smith said: "This new pillow is the next step in travel accessories; the combination of luxury memory foam and massage unit makes these the ideal travel companion.

"We are constantly researching new materials and trends to ensure that we are releasing the best and most up-to-date travel accessories for our customers, and we feel that the new pillows are the best of both."
