

Istanbul center provides quick & easy tests and results

Istanbul Airport has created a 5,000-square-meter PCR testing to serve passengers 24/7, with a capacity to perform more than 20,000 tests daily.

At any time of day or night, travelers arriving in Istanbul airport can get various Covid tests easily, with quick results provided via Whatsapp

This facility allows travelers to get PCR, Antibody and Antigen tests completed quickly, getting results without waiting in line. Those entering Turkey will be able to access the official website and access the form for entry.

The 5,000-square-meter testing site within the airport provides tests, results and a link to the government, all at once

The center at the airport makes getting test results a quick and easy procedure. Participants can pay with cash or credit card, obtaining antigen test results in 20 minutes, antibody test results in 45 minutes and PCR test results in 1.5 hours, getting results via Whatsapp. Medical organizations providing the testing include: Şafak Medical Group, Biotest and TRG International Health Services, with tests concluded in laboratories established within the airport as opposed to being sent out.
