

Registration opens for inter airport Europe event

Visitor registration has opened for inter airport Europe 2021, the leading flagship event for the international airport community.

Taking place from November 9-12 in Munich, the 23rd edition of the exhibition for airport equipment, technology, design and services marks the first major post-pandemic B2B event for the international airport sector.

This year's event has introduced a new hybrid event format that merges on-site opportunities with interactive digital networking, complemented by a dedicated VIP Buyer Program.

For the first time, visitors can attend inter airport Europe both in-person and online.

Once registered, all visitors enjoy full access to the platform and have the option to contact everyone exhibiting at inter airport Europe 2021. This will allow them to research for products and services, and to directly speak with suppliers and peers.

An AI-powered matchmaking service offers one-to-one business networking, helping suppliers and buyers make smarter networking decisions by suggesting relevant people to meet.

All attendees, in-person or remote, can now register via the Online Ticket Shop at

www.interairporteurope.com, with the added benefit of reduced advanced ticket prices and fast-track admission on-site.

Senior level decision-makers keen to place contracts can now apply for sponsorship through the VIP Buyer Program. Successful applicants will enjoy a personalized networking experience, including paid packages for flights and accommodation, a bespoke networking service with accurate matchmaking, pre-scheduled appointments with exhibitors and suppliers, and access to the exclusive VIP Buyers Lounge on-site.

Application forms can be requested by emailing europe@interairport.com.
