

Toronto Pearson launches e-commerce platform: The Shops at Pearson

Bringing the excitement of the travel retail experience into the homes of consumers, The Shops at Pearson makes Pearson the first Canadian airport to develop an online retail store

Toronto Pearson is proud to launch The Shops at Pearson, marking the first time a Canadian airport has developed an online retail store that brings the travel shopping experience into the homes of consumers.

With products available for delivery in Ontario, the new online shopping experience offers people near and far the convenience of shopping at home for products that are normally exclusively available to travelers.

Since not everyone is ready to return to traveling, Pearson is directly connecting shoppers with the brands and stores that they love. It's simple for Ontario residents to order online and have products shipped to their home. From beauty products to fashion accessories, the same travel shopping experience can be enjoyed from the kitchen table with Shops at Pearson – plus, heavily discounted prices and exciting promotions.

The launch of The Shops at Pearson is the perfect complement to our existing suite of online services at www.torontopearson.com. Travelers can browse online using their mobile device to reserve parking, Reserve and Collect duty free items, order food, reserve a lounge and book VIP services.
